REASONS FOR ALLOWANCE

1. Claims 1-20 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance: The Applicant arguments filed on 11/24/2006 are persuasive. The feature of independent claims 1, 7, 13, and 17 directed towards allowable subject matter is the image display, wherein the voltage applying component applies a voltage to the display side electrodes and the rear side electrodes such that a potential difference between the display side electrodes contributing to image display and the display side electrodes not contributing to the image display is smaller than a potential difference between the rear side electrodes contributing to the image display and the rear side electrodes not contributing to the image display, thereby further inhibiting a movement of particles between the display side electrodes contributing to image display and the display side electrodes not contributing to the image the image display. As argued by the Applicant Gates fails to teach or suggest the inhibition of particles between the display side electrodes contributing to image display and the display side electrodes not contributing to the image display as claimed. Therefore said feature of claims 1, 7, 13, and 17 in combination with the other limitations of the claims make them allowable over the prior art of record.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **David L. Lewis** whose telephone number is **(571) 272-7673**. The examiner can normally be reached on MTWTHF from 8 to 5. If attempts to

reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bipin Shalwala, can be reached on (571) 272-7681. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571)-273-8300.

5. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
